

America

The Vishuddhi of the Universe - with qualities of responsibility, democracy, freedom, discretion, noble ideas (811004; 831001); Is the place of Shri Krishna, of the Virat (890611); Americans... have to learn how to be self respecting (820124; 820125)

The 'attack of innocence' is the greatest weakness of this country - not to value the power of chastity is the biggest mistake. America (in 1986 - Ed) is at the brink of complete destruction (860907); America is lost into wrong seeking (980510); Los Angeles and all these places on the west coast of America, are still in danger of volcanoes, because of all kinds of devilish things that they are doing there (860803); The danger is not from outside for America... not from anywhere else... it is from 'within themselves'... so be careful (831001)
