

Angels

That sit on the left and the right side of our subtle system, waiting for us to ask for their help, in taking away all our problems (800609); The Ganas are on the left side and the angels are on the right side. The angels are born as angels. They are not afraid of untruth, or falsehood, or of what people will say, or of what they will lose in life. Truth is their life, and they will go to any extent to establish truth, to protect those who are in truth. This is the first great quality of angels. Sahaja Yogis are made as angels, and the quality of 'standing for the truth', at any cost, is so easy for Sahaja Yogis. If you stand for the right, for the righteous, for the truth, then all kinds of help 'to protect you', will be given. Angels don't take up problems upon themselves, but just solve them - they are fixed quantities... you can rely on them. There is a playfulness of angels also, and they are so confident. Miracles are done by the angels, and they are there to kill, to burn, to suppress, to remove all the evil people around you... but they cannot transform, and cannot raise the Kundalini. Hanuman was an angel. The angels are made by the Divine, and are always protected (890423)
