

Colonialism

The English are responsible for the poverty of India... you like it or not... they have created this problem for us... we didn't have this problem before. They treated us just like slaves... they had 'white' clubs, where Indians are not allowed... on our own soil. They killed thousands of people, raped so many women there. They did not allow us to come up (800927); The French... they dominated also many countries. This also one should understand... we should not dominate any more (800927)

Now you have killed the culture of all the Africans... the Africans have taken to all French and English cultures... absolutely... they have prostitutes the same way you have... they have the women the same way you have... their ideas of liberation are the same... only the Indians have resisted you. Otherwise everywhere you have never respected anybody's culture or anything... you have to face it; If you go to South America, you will be shocked the way people have wiped out all the people who lived there... all of them... except for Columbia... can you imagine... just see that (800927)
