

Reflection

If we are to reflect Mother, we have to face Her, as with a clean mirror (850528); We should understand that if we are to be the true reflection of the Adi Shakti, then we should be pure, absolutely pure, like the white snow... you should be so white that anything, any minute black spot should be seen by you, and in others also should be felt by you. If that light is achieved, by pure life, by pure thinking, by pure heart, it is not necessary to manipulate anything... it's all natural like the Mother Earth (970525)

Spirit is the reflection of God Almighty, which resides in the heart actually... but the seat of the Spirit is here, on top of your head, where is the fontanelle bone area... but it resides in the heart... it is the collective being (821007)
