

# Restrictions

No restrictions should be put on the wife or the husband... why did you talk to her... you should not have said... why did you do this... you should sit with me... all these things are not there  
(810904)

I have never put any restrictions on you... do what you like... whatever way you want to do it, you can do it... I have never been bothering... even about money or anything... but that is a testing ground where you are standing (010321)
