

Ridicule

All the people who are poor, always make fun of the rich. Like Italy is a very rich place you see... it has everything in it... and other countries who are not rich, say Switzerland or England... they are not rich. So the people who are poor, always make fun of the rich... and in the same way they always make fun of the Italians... but really the stupid people are they. In life also you'll find that anybody who has money... everybody will make fun of them. And always the poor countries... they are extremely meticulous... very little bit miserly... because so little they have. For a rich man... doesn't matter if a little money has gone this side or that side... doesn't matter (860725)
